Hey Eric,
```

I compared the LWG's inventory to the latest QM inventory and identified the surveys listed in the LWG's list that are *not* presently included in QM. (yellow = not in QM; pink = not sure).

Let me know if you want to talk about pulling additional data into QM. As you know, we're a bit financially strapped this year, but I'm game to explore possible solutions.

List of surveys from LWG *not* in QM:

*2005 Portland District O&M Sediment Characterization

ARCO Terminal 22T Berth 311 Dredge Data

**Characterization of Sediment and Proposed Dredge Depth, Fire Bureau Station 6 Maintenance Dredging Project
Col Wil Channel Deepening Reconnaissance Study
**Corps Dredged Material O&M Characterization
Focused ESA Riedel

**Gasco EE/CA G-P Linnton Site Preliminary Assessment

G-P Linkton Site Freiminary Assessment
Organochlorine and PAH by SPMD
Surface Water, Sediment, and Groundwater Sampling Report
**T4 Slip 1 Berth 401 Sediment Characterization
Terminal 4 Early Action EE/CA Report
US Moorings RI Sediment Investigation (may be in QM with slightly

different name) USGS - Bonn

Willamette Falls Locks 1996 Flood Deposits Sediment Quality Evaluation Zidell Waterfront Property RI/FS* $\,$
